

## **The new AIDA Winter Promise ensures guests can book assured and with flexibility**

December 9, 2021

Escaping from the winter blues and into the sun - with the 2021/22 winter program, AIDA Cruises is taking its guests to the most beautiful destinations. Sun-seekers can look forward to endless sandy beaches in the Caribbean. Exotic and exciting cruises will also be offered in the Arabian Gulf, for example, with a visit to EXPO Dubai. The Mediterranean and Canary Islands routes promise pleasant spring temperatures and unique vacation experiences. Winter fun can be found on AIDAprima, which has an ice rink on board. From Hamburg, the ship calls at metropolises in Western Europe on seven-day cruises.

With the new AIDA Winter Promise for all new bookings from December 9, 2021, with voyages beginning up to and including 31 March 2022, AIDA Cruises ensures guests can book assured and with flexibility. All AIDA rates offer the option to change both the travel date and the itinerary once and free of charge up to 40 days before departure.

With the extended AIDA health and safety concept, guests can enjoy their holidays relaxed and safe at the same time. All AIDA cruises take place with an adjusted passenger capacity. In addition to the regulations on vaccination protection and the additional COVID-19 tests prior to embarkation, the comprehensive preventive measures include regular health checks on board and extensive distance regulations. Comprehensive care is provided around the clock in the Medical Centres, which are equipped with the latest COVID-19 testing devices, among other things.

Detailed information on the new AIDA Winter Promise can be found at [www.aida.de/winterversprechen](http://www.aida.de/winterversprechen).

The AIDA Holiday Compass provides all the important information on travel preparation at a glance, including vaccination, testing and entry requirements, excursions and the health concept at [www.aida.de/urlaubskompass](http://www.aida.de/urlaubskompass).
